

AS Migration

draft-ietf-sidr-as-migration

Wes George
Sandy Murphy

Changelog 00-01

- This space intentionally blank. Keepalive

Relevant change in **IDR**-AS-Migration:

- Add RFC2119 boilerplate and two implementation sections (3.2 and 4.2) with normative language describing how to implement the features described by the document

Open items for WGLC

- Doc status – Info or PS?
 - Maybe depends on idr-as-migration status...
 - Is this a mandatory part of BGPsec, or optional?
- How to tie to BGPsec Protocol draft?
 - merge
 - Reference from draft
 - Use “updates” even though both are still drafts
