Progress and Next Steps

- Thanks for the detailed comments during WGLC #1
 - Step-by-step procedures - individual, multi-port, combo
 - Methods to evaluate repeatability of the results
 - Active Queue Management scope clarification
 - Recommending stateful testing using netperf wrapper tool kit from AQM WG
 - Editorial including appropriate references
- Latest (-01) revision addresses all the comments; will be posted when posting window opens
- Commence into WGLC #2, is RFC target for IETF 92 a good goal?
