Sarah Banks (sbanks@encrypted.net)
Fernando Calabria (fcalabri@cisco.com)
Gery Czirjak (gczirjak@juniper.net)

What's new in -05?

- Only minor changes
- Addressed the counters question – whose counters do I trust when looking at timing/time stamps? The DUTs, or the test tools?
- All previous comments addressed in -04
- Short time between Toronto and Honolulu
- -05 focused on a bit of language clean up between authors

What's coming in -06?

- In reviewing -05, and in changing our tools (markdown, FTW!) we are cleaning up the edits and fixing the nits
- Will address any further comments received here in Honolulu, or from list

Next Steps?

- Call for adoption in BMWG
