IETF 91 Chair's Report

Jari Arkko, IETF Chair

In This Report:

- Participants
- Visa issues
- Public telechats
- IANA transition
- IESG re-structuring
- Appeals
- Recognition

And More Online:

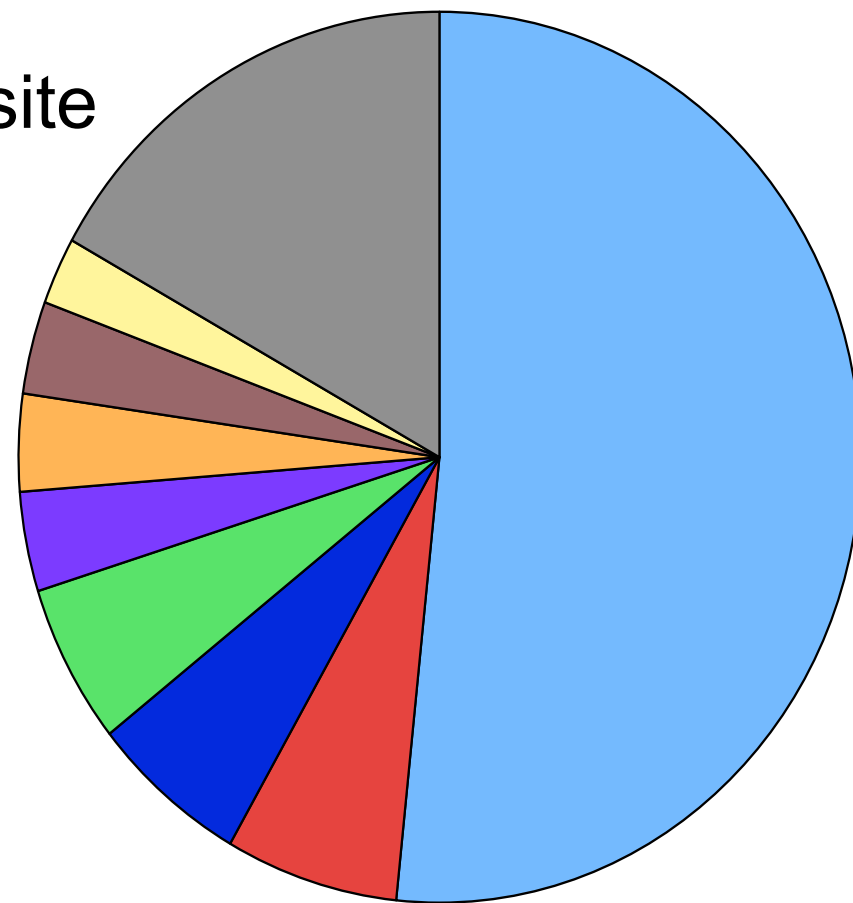

- RFC-Editor: <http://www.rfc-editor.org/rfc/IETFreports/ietf91.pdf>
- Secretariat: <https://www.ietf.org/proceedings/91/progress-report.html>
- IANA: <http://www.ietf.org/proceedings/91/slides/slides-91-iesg-opsplenary-1.pdf>
- NOC:
- Chair: <http://www.ietf.org/blog>

Participants

- 1080 people onsite
 - 136 newcomers
 - IETF 88 had 1189 people onsite
- 50 countries
 - IETF 88 was 54 countries

*IETF 88 was held in
Vancouver, BC, Canada*

■ US ■ CN ■ JP ■ CA ■ DE ■ FR ■ UK ■ NL ■ Others

Visa Issue

- Discussed in more depth in the IAOC presentation
- IETF, IAOC and Nomcom chairs opinions:

<http://www.ietf.org/blog/2014/11/getting-visas-to-an-ietf-meeting/>

- This is a significant issue and we are taking it very seriously
- This time Ray and few others made a significant positive impact
- Going forward, this matter needs to weigh more — but please be aware that there are no easy solutions

Public Telechats

- An experiment started from September 2014
- Provides transparency and opportunity to follow a topic
- We have had a few observers on each call
- IESG has decided to continue the practice

IANA Transition

- Significant discussion on this world-wide
- IANA transition Coordination Group (ICG) created with participation from multiple organisations — <http://ianacg.org>
- Bulk of the responsibility is in the communities being served
- At the IETF, we have discussed our wishes and requirements in various forms, now in IANAPLAN WG
- The IETF proposal coming up for last call soon

Re-Structuring Areas

- In October, the IESG announced a plan to re-organise IETF areas and working groups
- Our goal is to have changes in place in summer 2015
 - With enough time for the IESG and community to consider the best approach; ready for 2015 Nomcom cycle
- For the 2014 Nomcom cycle, IESG opinion is that the 2nd APP AD position need not be filled, but this is ultimately a Nomcom decision

Why Restructure?

- Match IETF structure to current topics
- Support growth in emerging topic areas
- Match management resources to workload
- Provide better flexibility to deal with naturally occurring fluctuations in workload and topics

What This Is NOT

- Closing applications work — IETF will continue to work on applications
- An attempt to shift IETF work to other topics — community's interest is what determines new WGs
- Change in overall AD workload situation — while re-structuring helps balance, workload is largely a function of work split between IESG and WGs

Next Steps

- Preparatory work in the IESG; currently building a map of IETF work clusters
- Developing proposals
 - We have several ideas, but do not have a proposal yet
 - Ideas: combining APP/RAI, re-balancing WG load among areas, adding a 3rd AD to a big area, spinning off a virtualization/SDN work area, making AD-WG assignment more flexible, ... suggestions welcome!
- Discussion in the community and the IESG — on the list, at IETF-92, IESG retreat, ...

Appeals

No Appeals

<http://www.ietf.org/iesg/appeal.html>

Recognition

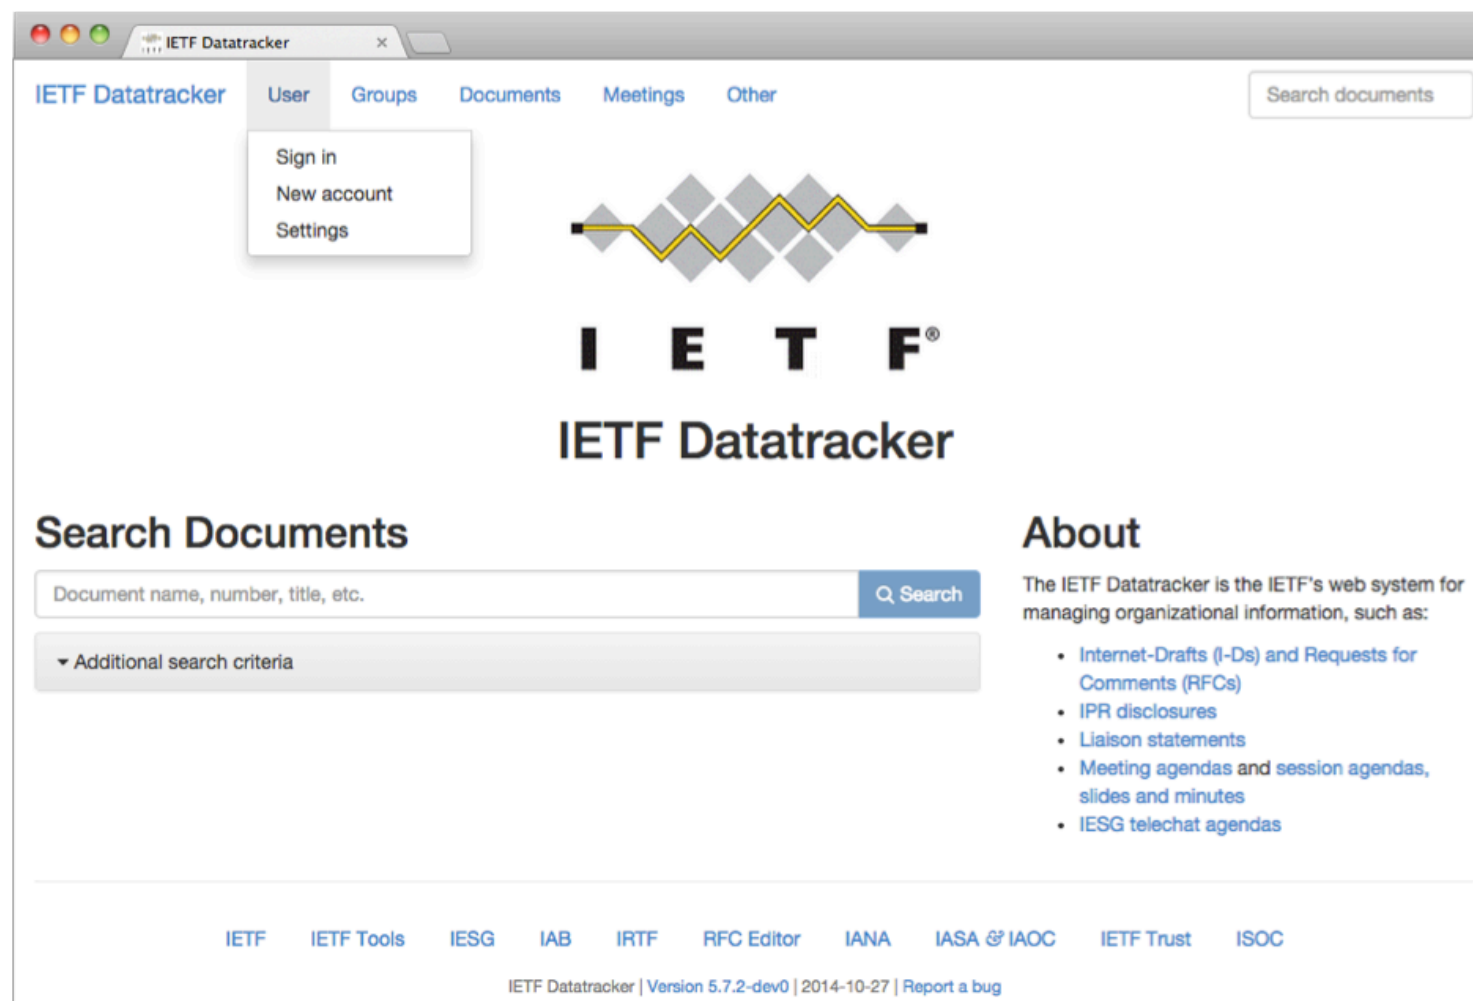

Alvaro Retana

- Great example of reaching out from the IETF
- Remote hubs <http://www.isocvenezuela.org/ietf91/>
- IETF-LAC <https://mail.lacnic.net/mailman/listinfo/ietf-lac>
- ...

Lars Eggert

Datatracker Facelift

- Bootstrap based
- Clean, uniform UI
- Better small device support

Thanks to Lars Eggert for initiating this project and converting most of the existing pages!
