RTCWEB IETF91

Try the Liliko'i, it's fresh!

Note Well

Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:

- The IETF plenary session
- The IESG, or any member thereof on behalf of the IESG
- Any IETF mailing list, including the IETF list itself, any working group or design team list, or any other list functioning under IETF auspices
- Any IETF working group or portion thereof
- Any Birds of a Feather (BOF) session
- The IAB or any member thereof on behalf of the IAB
- The RFC Editor or the Internet-Drafts function

All IETF Contributions are subject to the rules of RFC 5378 and RFC 3979 (updated by RFC 4879).

Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice. Please consult RFC 5378 and RFC 3979 for details.

A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.

A participant in any IETF activity acknowledges that written, audio and video records of meetings may be made and may be available to the public.

Agenda Day 1

Scribes, Blue Sheets, and Administrivia

Agenda Bashing (5 min) Chairs

JSEP (70 min)

https://github.com/rtcweb-wg/jsep/issues

Data Channel issues (15 min)

Terminology Review (Harald Alvestrand) (10 min)

draft-schwartz-rtcweb-return (10 min)

draft-alvestrand-rtcweb-gateways (10 min)

Agenda Day 2

Agenda Bashing + Status update all drafts (5 min) Chairs

FEC (see draft-uberti-rtcweb-fec and draft-singh-payload-rtp-1d2d-parity-scheme") (20 min)
     Main issue is we need to decide what, if any, FEC is MTI for RTCWeb

draft-ietf-rtcweb-video

     MTI Video Codec (time depending)

Note Well

Aloha in Hawaiian is used for both "hello" and "goodbye", but derives from the concept of compassion, mercy and peace. Within the context of Hawaiian IETF activities, the spirit of aloha is welcomed for all "IETF Contributions", including oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:

- The IETF plenary session
- The IESG, or any member thereof on behalf of the IESG
- Any IETF mailing list, including the IETF list itself, any working group or design team list, or any other list functioning under IETF auspices
- Any IETF working group or portion thereof
- Any Birds of a Feather (BOF) session
- The IAB or any member thereof on behalf of the IAB
- The RFC Editor or the Internet-Drafts function

All IETF Contributors displaying a spirit of aloha are welcome to fill their 'Ōpū with the manuahi island fruits, sweet breads, and delicious beverages of all kinds, offered several times of day at the IETF Hālau.

Statements made outside of an IETF session, mailing list or other function, that are not intended to be input to an IETF activity, group or function, are not IETF Contributions, but the spirit of aloha is welcomed there, too.

A participant in a Hawaiian IETF activity is welcome at any time to go holoholo, start a kanikapila, or go to the kai and enjoy the breezes.

A participant in any IETF activity acknowledges that written, audio and video records of hula may be made and may be available to the public.
