

draft-ietf-sidr-rpsl-sig

Updates

Brian Haberman

Róbert Kisteleki

Quick Review

- Draft has been dormant for... a while
- Provide a mechanism to sign RPSL objects
- Authentication/Integrity check across IRR databases
- Digital signature using RFC 6487 resource certificates

Pending Updates

- Drop 'o' field
 - Multi-party signing can be accomplished with multiple signature attributes
- Tighten language to only allow URLs supported by CA/RPKI

Next Steps

- Submit update with suggested edits
- Re-run WG Last Call
