TURN Server Auto Discovery

draft-ietf-tram-turn-server-discovery-01

March 2015

IETF 92

Authors: Prashanth Patil, Tiru Reddy, Dan Wing

Presenter : Dan Wing

Discussion (1/2)

Retain mechanism to learn 'Domain-Name' using PTR Lookup on client's IP address?

- Need to determine public IP address using STUN. Requires STUN discovery!

- Manageable within private networks

- Author's Recommendation: discard mechanism

Discussion (2/2)

- Include DNS Service Discovery for TURN in private networks?

- Should it include mDNS?
  - mDNS limited to local link.

  - Hybrid Unicast/Multicast DNS-based Service Discovery attempts to address mDNS limitations. Should we track progress?
