

AQM Characterization Guidelines

draft-ietf-aqm-eval-guidelines-07

N. Kuhn, P. Natarajan, N. Khademi and D. Ros

IETF93 - July 2015

Main changes from *-02 to *-07

from *-02 to *-03 : include Gorry's comments

- MUST/SHOULD/MAY terminology more accurate
- addition of one new multi-aqm scenario
- introduction of a conclusive table that clearly states the requirements for each scenario

from *-03 to *-04 : include Jim's comments

- no "running test code" : no dependency to the platform
- "packet scheduling" :
 - memo refers to AQM only
 - to be complemented with guidelines on interaction between AQM and scheduling
 - inheritance of all the guidelines from this document
 - plus any additional scenarios relevant for packet scheduling

from *-04 to *-07

- english nits
- metrics (CDF, ellipsis)
