CLUE Signalling

IETF 93

Connections to other documents

- Framework, data model, protocol document have received WGLC

- No major inconsistencies with signaling document identified
  - Version -06 of signaling will be updated to match precise syntax and state machine of -04 of protocol document

Changes needed for -06

- Change usage of SRTP/DTLS for CLUE-controlled media lines from *mandatory* to *recommended*.
  - Outcome of discussion at IEF92
- Update SDP section, examples to use *draft-ietf-mmusic-data-channel-sdpneg*
  - Using *sdpneg* plan of record since IETF91; may cause delays in finalisation, depending on status of draft
- Incorporate earlier review comments

Next steps

- Produce version -06
  - Version -06 to be done by 1st August
- Will then be ready for WGLC
