Proposal for an ICE WG

- There is a renewed interest in ICE with the adoption of RTCWeb.

- The problems are better understood, so there is multiple proposals for improving ICE.

- The proposal would be to move RFC5345bis and related proposals to a new WG.

- draft-ietf-mmusic-ice-sip-sdp would stay in MMUSIC.

Motivation

- Having ICE in a smaller WG might help getting more eyes on the ICE related drafts.

- Expecting more of other WG interaction with ICE. (MIF, TAPS, Stack Evo). A separate ICE WG simplifies that.

- Hackathon synergies? (More running code)

- Mailing-list for discussion: ice@ietf.org
