RMICAT CC status

CAT CC Requirements [reqs](#) in RFC editor queue

evaluations progressing towards completion. Present effort focused on (remaining aspects of):

- Wireless testcases – wifi testcases in particular
 - New work for inclusion: [wifi-test-cases](#)*
- Video traffic source model: [draft-zhu-rmcat-video-traffic-source](#)

CC candidate drafts adopted for experimental

ada: [draft-ietf-rmcat-nada](#)

ream: [draft-ietf-rmcat-scream-cc](#)

CC: [draft-alvestrand-rmcat-congestion](#)*

coupled CC control candidates adopted

ared Bottleneck Detection: [draft-ietf-rmcat-sbd](#)

coupled CC over shared bottlenecks: [draft-rmcat-welzl-coupled-cc](#)*

“ART” Interactions

MCAT CC – codec interactions

- [draft-zanaty-rmcat-cc-codec-interactions-00](#) adopted*

MCAT CC – application (e.g. W3C API) interactions

- draft expected before IETF 94

MCAT CC feedback via RTP extensions

- Conjectured to come in some form (for AVTEXT)
- Example of a present draft proposal:
[draft-holmer-rmcat-transport-wide-cc-extensions-00](#)
