FEC in WebRTC

ietf-rtcweb-fec-01

Remaining Open Issues

- Not a lot of feedback (but thanks Magnus!)
- Mostly editorial issues remaining

Non-unified-plan FEC

- Text says protecting multiple streams with a single FEC stream is out of scope (because no way to do this with unified plan)
- Magnus asked about support for a=group:FEC-FR (i.e. protection through separate session)
- WebRTC won't generate it (unified again); propose that we also reject it if offered

Editorial Open Issues

- Change title
- Add stats for Opus FEC
- Provide nominal guidance on FEC overhead in security considerations
- Add note about DC FEC
- Discourage 2198 XOR FEC
- Add 4.2 note about JSEP
