

SACM Architecture Discussion

Nancy Cam-Winget
July 2015

SACM Architecture - Conceptual

	Provider	Requestor
Capability 1	X	
Capability 2	X	X
Capability 3		X

Status

- Draft v03 published in March, 2015
- Comments needing discussion:
 - Jim Schaad’s issues on GitHub regarding diagram and “Controller” function (central abstraction)
 - Henk’s individual notes on renaming of components and other comments (need to put on GitHub)
- Interoperability of Providers/Consumers not supporting a SACM data model (e.g. existing standard interfaces): this is what SACM needs to define as MUST for SACM compliance?

Q & A
