

# TCP Increased Security (tcpinc) WG

IETF 93

Prague

2015-07-20 15:20-17:20

Chairs: Tero Kivinen  
Marcelo Bagnulo

Area Director: Martin Stiemerling  
Tech Advisor: Stephen Farrel

Mailing list: [tcpinc@ietf.org](mailto:tcpinc@ietf.org)

# Agenda

- Administrativa
  - Blue sheets, Jabber scribe, Minute-taker
- Agenda Bashing
- Tcpcrypt update – andrea, 10 min
- TLS-based solution update – eric, 10 min
- Way forward – all, 40 minutes

# Proposal selection process

- WG prefers Option 1:
- By draft cut-off for IETF94 each of the proposals should have:
  - A full but not final specification
    - For tcpcrypt: means including all the changes resulting from WG input
    - For TLS means a complete profile for TCPINC
  - An implementation that matches the specification that the implementers claims that matches the above specification
- If both fail to deliver: we close the WG
- If one fails, we choose the other one as starting point
- If both deliver,
  - We do a consensus call, for 2 weeks
  - If no consensus : we do a coin toss
- If we dont finish this meeting with a room consensus on this slide (that can be changed during the meeting), then we close the WG.
- If the room consensus is not confirmed in the list, we close the WG.
