Rate Abatement Algorithm

draft-ietf-dime-doic-rate-control-02

IETF 94

Yokohama, Japan

Status

- No changes since last meeting
- Dependent on peer report defined in draft-ietf-dime-agent-overload

Open question

- Does rate algorithm apply to host reports
- Current thoughts – only works in networks where 100% of server selection is done in clients

Next Steps

- Review comments posted to list
- Move to WGLC when finished
