Draft-mauch-bgp-reject

Jared Mauch

NTT

What is it?

- An EBGP speaking device MUST NOT advertise routes without configured policy

- Router vendors already know this
  - Default in IOS-XR
    - Can override with "bgp unsafe-ebgp-policy" knob
  - Default in JunOS

- Codifying this in a draft for purpose of implementers to prevent routing leaks or other damage

Draft Status

- Posted draft in July around the Prague meeting time

- Received input from IDR list and incorporated into the -01 document
