IETF 94, Yokohama, November 2015

P2MP in a Nutshell

Use multiple P2P adjencies on broadcast.

- ▶ Minimises Multicast dependence (discovery only)
- ▶ Allows topology shaping & pairwise metrics

LAN

P2MP (full mesh)

P2MP (policy applied)

Changes

- Don't use new PDU type.
- Multicast point-to-point IIH for discovery.
- Unicast point-to-point PDU afterwards.

That's it
