

draft-droms-6lo-ethertype-request

Ralph Droms

Request for Ethertype for IPv6 datagrams using LoWPAN (RFC 4944) encapsulation

- “Ethertype” code point for those IP-over-foo methods that use a code point
- Applies to any IPv6 datagram using the Dispatch
- Use cases:
 - IEEE 802.15.9 Multiplexed Data Service
 - WiFi Alliance HaLoW
 - Other layer 2 technologies such as Ethernet and debugging tools
- Publication of this document authorizes IETF to request an Ethertype
