Trial Run of Guidelines
draft-song-dns-wireformat-http

- Draft: DNS protocol over HTTP protocol

- General observations:

  - Basically useful

  - Was (and maybe still is) a bit too long, unprioritized

- Should refer to <privacy@ietf.org>for advice

- Confused me with heterogeneity & adapability

- Possible duplicates:

  - Internationalization / Localization

  - Acceptability / Accessibility

  - Availability / Open Standards
