Diffs

- Semantics vs Messages drafts
 - Make sure all behavior is in Semantics
 - Make sure all encoding and IANA values are in Messages
- Requirements language
 - Significant re-organization to make language less descriptive and more prescriptive.
 - Should not have changed the meaning, but deserves a thorough re-read.

Outline of -03 draft

- Protocol Overview
 - A descriptive section
- Message grammar (ABNF) & field definitions
- Consumer behavior
- Producer behavior
- Forwarder behavior
- Names
- Cache Control / Content Object Hash / Link / Hashes
- Validation
- Interest Return
