Stream Schedulers and
User Message Interleaving for SCTP

Randall Stewart (randall@lakerest.net)

Michael Tüxen (tuexen@fh-muenster.de)

Salvatore Loreto (Salvatore.Loreto@ericsson.com)

Robin Seggelmann (rfc@robin-seggelmann.com)

Status

- draft-ietf-tsvwg-sctp-ndata-07.txt
- Changes:
  - Addresses all known issues
  - Changed the format of the I-FORWARD-TSN chunk
  - Use a single stream scheduler behaving differently when interleaving support is enabled or not instead of two schedulers

Implementation Status

- Interoperable with the code in the INET simulation framework for OMNeT++.

- Running Code for FreeBSD (Hackathon), still being tested and debugged.

- Found Issue:
  - I-FORWARD-TSN chunk needs a flag to indicate whether the MID is for ordered or unordered messages.
