November 2016

Status

- Current version draft-ietf-ace-cbor-web-token-01
  - No changes since Berlin

- Issues tracked at https://github.com/erwah/ietf/issues
  - Only remaining issues about adding better examples

Next Steps

- Create better examples and validate them with COSE implementations

- Editors plan to use Ludwig Seitz's CWT implementation to generate examples
  - Are there other implementations people would recommend that we use to validate examples?
  - Even better yet, does anyone want to volunteer to validate them?
