

DOTS Requirements Update

draft-ietf-dots-requirements-03

A. Mortensen, B. Moskowitz, T. Reddy

Data channel requirements

- DATA-003: removed session configuration requirements
- Session configuration parameters no longer configured over data channel
- DOTS client specifies session configuration over signal channel
 - Heartbeat interval
 - Acceptable signal loss
 - Mitigation lifetime

Security Requirements

- SEC-003: Highlight need for secure interfaces between DOTS server and DOTS client used as a gateway.

Data Model Requirements

- DM-007: Acceptable signal loss
- DM-008: Heartbeat interval
- DM-009: Relationship to transport
 - Previously DM-007

Remaining Work?

- Review security considerations
- Changes resulting from recent drafts?
- WG last call?
