Packet Loss Measurement Model

- SLA Driven Services.
- Model aims to calculate the packet loss measurement independently for each service SLA.
- Class of service with color and colorless measurement.
- This can be used for active passive measurements.
- This explains the model not the protocol stack.
- Independent of transport technologies.

Measurement Models

- Complete Loss measurement in one direction.
- Color based Data measurement.
- COS based Data measurement.
- COS and Color Based Measurement.

Next Steps

- Draft Must be reviewed.
- Comments anticipated.

Thank you
