

Inclusion of Internationalized Email Addresses in PKIX certificates

draft-ietf-lamps-eai-addresses-02.txt

Weihaw Chuang
Alexey Melnikov

Changes since -00

- Clarified that smtputf8Name is allowed in both subjectAltName and issuerAltName
- Disallow wildcard characters in smtputf8Name
- Disallow Byte-Order-Mark character at the beginning of smtputf8Name
- Proper ASN.1 module
- Correctly request OIDs from IANA
- Added Security Considerations (confusable characters, etc.)
- Use example.com domains in examples

Next steps

- Ready for WGLC?
