NMRG Present and Future

Status of I-Ds

- draft-irtf-nmrg-autonomic-sla-violation-detection-04

  – Ready for last call?

- draft-irtf-nmrg-location-ipfix-07

  – Passed IRSG review

    - Does it belong to IRTF? Or IETF?

  – Call for feedback at OPSAWG

    - In progress

Recent/Present

- Joint Meeting with SDN and NFV RGs on Managing Virtualized and Programmable Networks
  - Jul. 22nd 2016
- Workshop on Managing Networks of Things
  - Nov. 13th 2016
- Interim "regular" meetings
  - Planned to have 1 per year
  - Last one during IEEE/IFIP NOMS 2016, Istanbul
  - Next one during IFIP/IEEE IM 2017, Lisbon

Future

- Concentrate on more specific issues?
  - Dedicated themes seems to work better:
    - Series on Autonomic Networking ($\rightarrow$ ANIMA WG)
    - Series on flow-based network measurements
  - Joint meeting(s)
    - NMRG/SDNRG/NFVRG (July 2016)
  - Overall, good/better attendance, active sessions but low/no consecutive I-Ds
    - Difficult to measure RG progress and production

Future (cont.)

- Which other topics?
  - 5G management
  - NFV and SDN management (joint with SDN/NFV RGs)
  - IoT management (joint with T2T RG)
  - Visualization and user interfaces
  - …
- Cross-disciplinary topics
  - How to effectively and efficiently bridge the communities?
