

RMCAT DT status update

Zaheduzzaman Sarker
Representing DT

Since IETF96

- DT met twice
- Addressed the comments from IETF96
- Worked on FIXMEs on -00 version of the draft-dt-rmcat-feedback-message
- Discussed and analyzed low bitrate use cases
- Updated packet format and analyzed the possible RTCP bandwidth required
- Worked on (optimization) alternatives
 - Optional block for ECN vector
 - Compressed loss information
 - Not included in -01 version of the draft due to lack of time to discuss.
- Should complete the task by IETF98
