Draft Updates since IETF 96 (-01)

- Addresses
 - [YANG Doctor's \(YD\) review](#)
 - [WG volunteer review](#)
- Major editorial revision
 - enhanced descriptions, consistency, references
- Updates in the YANG leaf node types (e.g. key-id from string to binary for key-management, and so on) based on the YD comments
- Better alignment of e.g. packet-distribution with other IPPM work (namely the registry)
- Examples updated based on the module changes.

Way Forward

- The draft has benefitted significantly from the latest round of reviews—Thank you!
- WG last call?
