<http://openoverlayrouter.org>

LISP Beta Network

- A world-wide **experimental** testbed for LISP research and testing
- Operated with a **best-effort** policy
- Interoperates with the public Internet
- Runs several LISP implementations
 - Cisco
 - Open Overlay Router
 - OpenLISP
 - Lispers.net

LISP Beta Network

- Currently maintained by the Open Overlay Router community
 - Thanks to all the participants
 - Thanks to the people that deployed and maintained it for many years
- Removed outdated equipment
 - Way more stable now
- We provide EIDs (IPv4 or IPv6) on-demand
 - 153.16.0.0/16 for IPv4
 - 2610:D0::/32 for IPv6

Current status

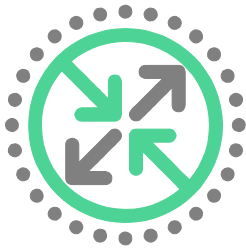

Call for new participants!!!

- New implementations
- New xTRs
- Participants willing to host
 - Map-Server/Map-Resolver
 - Proxy nodes
- Participants willing to host VMs

Reach us at:
