# The Lifecycle of MUD

Steven Rich
Thorsten Dahm
IETF98, Chicago

# Why?

- MUD can be useful
  - ... if used correctly
- Introducing a new concept to the manufacturing Industry
- Help manufacturers moving to IP-based networking
- Help operators to use MUD as intended

# How?

- Consider IoT Devices having 'weak security'
- Blocking unwanted traffic
  - Important for Network Operators
  - Important for the rest of the Internet
- Centralizing management of potential 1000's of devices on the network
- Eases the Enforcement & Audit of security policies
- Calling out bad practices by Manufacturers

# What do we need?

https://tools.ietf.org/html/draft-srich-opsawg-mud-net-lifecycle-00

https://tools.ietf.org/html/draft-srich-opsawg-mud-manu-lifecycle-01

Feedback :-)
