Using Third Party Services for IETF Work

draft-nottingham-wugh-services-00

What this draft tries to do

- Many WGs are now using external tools/services

- Experiences are generally positive:

  - Significant increase in efficiency

  - Improved access for a broader audience

- However, there is Fear, Uncertainty and Doubt:

  - Grumbling about new things ("it's not the mailing list!")

  - Lack of clear guidance

What this draft does not try to do

- Does not address specific tools or give general advice

  - Point is to define high level requirements

  - This has a much slower rate of change

- Rough Consensus to Use

- Equal Access

- Clear Procedure

- Notification

- Neutrality

- Recoverability

- Administrative Access
