

# draft-ietf-dots-requirements-02

Andrew Mortensen

Bob Moskowitz

Tiru Reddy

# Work in progress

- -02 revision ready soon.
- Possibly -03 before IETF 96, depending on feedback on -02 draft.

# Changes in -02

- DOTS relay eliminated as a separate agent
- Removal of local caching operational requirement (OP-009)
- Evaluating what changes to make to align with draft-ietf-dots-use-cases-02
- Aim to publish closely on heels of use cases update

# Additional feedback requested

- Authentication/authorization
- Session redirection
- Data channel
- Security considerations
- Congestion considerations
- Any conflicts with use cases

# Thank you
