Inter-ALTO
Problem Statement & Next Steps

Piotr Wydrych <piotr.wydrych@agh.edu.pl>

No document changes since IETF93

- 3 generic use-cases in -02 version of the problem statement draft
  - Remote view of topology
  - Detailed information on remote topology
  - Partitioned networks
    - 1st and 2nd use-case are also valid for this one

Next steps?

- Defining requirements
  - Focus on what should be mandatory to exchange
  - Don't focus on security
- Detailed specification of framework
  - Re-usage of other generic frameworks?
    - PID properties?
    - Generic costs?
- Formatting
  - Split into few docs (problem statement, requirements, specification) or together?

- Who've read the draft?
