Addressing Requirements for Wireless IPv6

Bob Hinden
ADDRESSING / IPv6

- There will soon be a large number of wireless IP Devices
  - Cellular, Bluetooth, IEEE802.11, Satellite, …..
- Wireless_mobile_always-on IP devices need global addresses
- IPv4 global addresses are being rationed today
- IPv6 has a very large number of global addresses
- Use IPv6 for Wireless Internetworking!
- How to bring this message to wireless forums & standards groups?
